PARTNERING FOR A  
**THRIVING FUTURE**

CONSERVATION LANDSCAPES INSTITUTE

PARTNERING FOR A

## THRIVING FUTURE

*The Eastern Cape, home to seven of South Africa's nine biomes, is one of the most biodiverse regions on Earth. Yet, 92% of its endemic Albany Thicket has suffered severe degradation. This crisis is our call to action.*

*Conservation Landscapes Institute (CLI) is a South African nonprofit organisation, dedicated to restoring and connecting vital conservation landscapes between the Great Fish River and Addo Elephant National Park, in the Eastern Cape. Through systems-based thinking and scientific-rigor, we secure biodiversity, strengthen ecosystems, and foster a nature-based economy, delivering lasting social, economic, and environmental benefits.*

### OUR VISION

We unite landowners, conservationists, and local stakeholders to drive transformational change, ensuring thriving ecosystems and resilient communities.

**SECURING  
biodiversity**

**RESTORING  
ecosystems**

**EMPOWERING  
communities**

**INTEGRITY  
to build trust**

**SCIENCE  
in conservation**

**INNOVATION  
for impact**

### OUR VALUES

- Integrity, transparency, and professionalism to build trust and partnerships.
- Science-driven, pragmatic decisions for effective conservation.
- Collaboration and innovation for large-scale impact.

## THRIVING FUTURE

### OUR STRATEGIC FOCUS

CLI's mission is powered by three strategic enablers supporting six strategic pillars, that are achieved through integrated thinking and partnerships.

### STRATEGIC ENABLERS

#### GOVERNANCE:

Ensuring effective systems with safeguards and legal compliance, financial oversight, and strategic planning.

#### ADMINISTRATIVE MANAGEMENT:

Coordinating operations with reporting, monitoring, and stakeholder engagement.

#### INNOVATION AND TECHNOLOGY:

Advancing conservation with cutting-edge tools and technology.

### STRATEGIC PILLARS

#### LAND & LAND MANAGEMENT:

Securing and effectively managing priority corridors in the Albany Bioregion through strategic facilitation and collaborative agreements.

#### RESTORATION AND REWILDING:

Implementing restoration and rewilding initiatives alongside research at the ecological, habitat, and biodiversity levels.

#### SPECIES:

Supporting the conservation and range expansion of priority species, such as rhinos, elephants, leopards, and birds of prey, through targeted monitoring and management.

#### AREA INTEGRITY:

Enhancing regional safety and security through risk assessments, strategic planning, and the development of capacity and capability.

#### COMMUNITY:

Advancing support and opportunities for our communities and stakeholders through inclusion, partnerships, education, and beneficiation.

#### RESILIENCE AND SUSTAINABILITY:

Unlocking innovative, catalytic, and transformative models that support resilient and sustainable landscapes for the benefit of people.

## WHY YOUR SUPPORT MATTERS

Protected landscapes in the Albany Bioregion sustain biodiversity, combat climate change, and support a thriving nature-based economy that generates jobs and conservation funding, serving as a global model of success.

Support our conservation efforts through funding, developing strategic partnerships, and sharing expertise. Help amplify our mission, advocate for sustainable policies, and reduce your carbon footprint to protect biodiversity and restore vital landscapes.

**YOUR LEGACY INVESTING IN CLI MEANS MORE THAN PROTECTING BIODIVERSITY, IT'S ABOUT FORGING A REPLICABLE MODEL THAT BALANCES ECOSYSTEM RESTORATION, COMMUNITY PROSPERITY, AND ROBUST PROTECTION. YOUR LEGACY WILL ECHO ACROSS AFRICA, SHOWING HOW REVIVED LANDSCAPES CAN SUSTAIN WILDLIFE AND PEOPLE IN ONCE-DEGRADED REGIONS.**
